OGUNSUSI Elizabeth Bukola

JUNIOR DEVOPS ENGINEER

ogunsusibukolaelizabeth@gmail.com | github.com/Ogunsusi-Elizabeth

PROFESSIONAL PROFILE

Junior DevOps engineer in training, building practical skills in Linux, Docker, AWS, Python, and Git. Transitioning into DevOps after three years of teaching experience. Currently completing a 16-week DevOps training program at Livingworth Academy.

TECHNICAL SKILLS

Linux commands and Bash scripting | Docker | AWS | Python | Git and GitHub

PROJECTS

Linux Server Health Monitoring Script

Completed project | Linux, Bash, Git, GitHub

Built a Bash script using Linux commands to check basic server health and produce a report. Learned to automate manual checks, interpret command output, and use Git and GitHub to save and share work.
